

## RAVO roller brush

The new RAVO roller brush has been developed by the Dutch RAVO dealer and is available for all RAVO 5-Series units with third brush preparation and quick coupling system.

This new brush means extra functionality for the RAVO 5-Series. It can be used in road construction, for snow removal, but also to quickly clean big surfaces like squares. The RAVO roller broom has adjustable rotation speed and operates over the complete width of the sweeper. It has angle adjustment and side shift.

Side shift	460 mm
Angle adjustment	30°
Width brush	1800 mm
Diameter brush	600 mm
